Dear [Redacted]

25X1

We are interested in a proposal for examining the general possibilities of the recording techniques listed in the attached outline. The extent of your effort on each technique should be comparable to that employed in discussing the film recording technique in your 7 January 1954 proposal.

Such a surface study of a few thousand dollars is necessary to indicate to us the desirability of further research in this field.

Yours truly,

[Redacted]
